

Description

General Purpose Stainless Steel Pressure Gauges are designed for pressure measurements in industrial applications where high accuracy is not needed. General Purpose Stainless Steel Pressure Gauges have different case designs and wide pressure measurement range and are all compatible with process fluids that do not attack AISI 316L. The filling liquid used in the products lessens the effects of high dynamic pressure loads and vibration to the pressure gauge.

Industrial Applications

Water&Waste-Water treatment plants, machine building, HVAC systems, hydraulic and pneumatics, process lines
