Double diaphragm type high working pressure PN 40,100,250 or 400

APPLICATIONS

Differential pressure measurement with a high differential pressure overload and/or high working pressures (static pressures), also in aggressive ambient for gaseous, liquid, viscous and aggressive media monitoring and control of pumps filter monitoring level measurement in closed tanks

DESIGN

High overpressure safe on either sides.
Pressure rating PN 40, 100, 250 or 400.
Hydraulic cushioning protection against rapid pressure changes
The torque pipe seals with bearing, assures a frictionless path.
Overpressure protection in both directions up to the max Static pressure rating.

CASE DIAMETER

100 and 160 mm

ACCURACY CLASS ⁽¹⁾

Stainless steel AISI 316L: 1,6
Monel 400 (2.4360): 2,5
Hastelloy C276: 1,6

⁽¹⁾ at 20 °C and zero static pressure
