

Capsule pressure gauge, copper alloy or stainless steel Standard version

Models 611.10 and 631.10, NS 50 [2"], 63 [2 1/2"]

WIKA data sheet PM 06.01

For further approvals,
see page 7

Applications

- Pressure gauge for use in a protected environment
- Medical, vacuum, environmental, laboratory technology, for contents measurement and filter monitoring
- For gaseous and dry media
- Model 611.10 with wetted parts from copper alloy, for non-aggressive media
- Model 631.10 with wetted parts from stainless steel, for aggressive media

Special features

- Zero point setting in front
- Special connection location on request
- Low scale ranges from 0 ... 25 mbar to 0 ... 600 mbar or 0 ... 10 inH₂O to 0 ... 240 inH₂O

Capsule pressure gauge, model 611.10

Description

The model 611.10 and 631.10 capsule pressure gauges are based upon the proven capsule measuring system. The capsule element measurement principle is suitable for very low pressures. On pressurisation, the expansion of the capsule element, proportional to the incident pressure, is transmitted to the movement and indicated.

The modular design enables a multitude of combinations of case materials, process connections, nominal sizes and scale ranges. Due to this high variance, the instrument is suitable for use in a wide range of applications within industry.

The case is made of steel (black) with a snap-fitted window. The material of the process connection is a copper alloy.

For mounting in control panels, the capsule pressure gauges can, depending on the process connection, be fitted with a mounting flange or with a triangular profile ring and mounting bracket.

The scale ranges of 0 ... 25 mbar to 0 ... 600 mbar or 0 ... 10 inH₂O to 0 ... 240 inH₂O and the vacuum and +/- scale ranges ensure the measuring ranges required for a wide variety of applications.

Specifications

Basic information	
Standard	EN 837-3 → For information on the "Selection, installation, handling and operation of pressure gauges", see technical information IN 00.05
Further version	- Oil- and grease-free - For oxygen, oil- and grease-free
Nominal size (NS)	- Ø 50 mm [2"] (only for model 611.10) - Ø 63 mm [2 ½"]
Connection location	- Lower mount (radial) (only for NS 63 [2 ½"]) - Centre back mount
Window	Polycarbonate
Case	- Steel, black - Stainless steel (only for NS 63 [2 ½"])
Mounting	- Without - Surface mounting flange, steel, black (only for NS 63 [2 ½"]) - Panel mounting flange, steel, black, screwed - Panel mounting flange, steel, chrome-plated, screwed - Slip-on bezel, steel, black, pressed on - Slip-on bezel, stainless steel, pressed on - Slip-on bezel, polished stainless steel, pressed on - Triangular profile ring with mounting bracket, steel, black ¹⁾ - Triangular profile ring with mounting bracket, polished stainless steel ¹⁾ → For information on "Mounting types, mounting flanges, panel cutouts", see technical information IN 00.04
Movement	- Copper alloy - Stainless steel (only selectable for NS 63 [2 ½"])

1) Only for back mount

Measuring element		
Type of measuring element	Capsule element	
Material (wetted)		
Capsule element	Model 611.10	Copper alloy
	Model 631.10	Stainless steel 316L
Seal	Model 611.10	NBR
	Model 631.10	FKM
Process connection	Model 611.10	Copper alloy
	Model 631.10	Stainless steel 316L
Leak tightness	■ Leakage rate: < 1 · 10 ⁻³ mbar l/s	
	■ Helium tested, leakage rate: < 1 · 10 ⁻⁵ mbar l/s	

Accuracy specifications	
Accuracy class	
EN 837-3	■ Class 1.6
ASME B40.100	■ $\pm 2\%$ $\pm 1\%$ $\pm 2\%$ of measuring span (grade A)
Zero point setting with adjustment screw	- In front, after opening the window ¹⁾ - In front, through the opening in the window ²⁾
Temperature error	On deviation from the reference conditions at the measuring system: $\leq \pm 0.6\%$ per 10 °C [$\leq \pm 0.6\%$ per 18 °F] of full scale value
Reference conditions	
Ambient temperature	+20 °C [+68 °F]

1) For versions without mounting flange or with surface mounting flange

2) For all versions with mounting (except for surface mounting flange), the opening of the window for the zero point setting is sealed with a taper plug.
