

Bourdon tube pressure gauge, copper alloy

Liquid filling, plastic case

Model 113.13, NS 40 [1 ½"], 50 [2"] and 63 [2 ½"]

WIKA data sheet PM 01.04

For further approvals,
see page 6

Applications

- For measuring points with high dynamic pressure loads or vibrations
- For gaseous and liquid media that are not highly viscous or crystallising and will not attack copper alloy parts
- Pumps and compressors
- Hydraulics

Special features

- Cost-effective design
- Vibration resistant

Description

The model 113.13 is a liquid-filled pressure gauge with plastic case. The liquid filling causes damping of the internal components and contributes to an increased vibration and shock resistance. Thus the pressure gauges are suitable for installation in machines and plants where strong vibrations and shocks are expected.

These pressure gauges are based on the proven Bourdon tube measuring system. The deflection of the Bourdon tube is transmitted to a movement and indicated.

The plastic case and the window are welded together and an O-ring seals the process connection at the case. In this way the instrument fulfils the high requirements for IP65 ingress protection.

With accuracy class 2.5 and the available nominal sizes 40 [1 ½"], 50 [2"] and 63 [2 ½"], this model is suited for a wide range of applications in industry.

The mounting bracket, which is available as an option, enables the panel mounting of pressure gauges with back mount process connection. The nominal size 63 [2 ½"] version with back mount process connection is alternatively offered with a mounting flange on the front of the instrument. This mounting flange is used when, for example, panel mounting is only possible from the front.

Specifications

Basic information	
Standard	■ EN 837-1 ■ ASME B40.100 → For information on the "Selection, installation, handling and operation of pressure gauges", see Technical information IN 00.05.
Nominal size (NS)	■ Ø 40 mm [1 ½"] ■ Ø 50 mm [2"] ■ Ø 63 mm [2 ½"]
Connection location	■ Lower mount (radial) ²⁾ ■ Centre back mount
Window	Acrylic glass (PMMA)
Case	
Design	Safety level "S1" per EN 837-1: With blow-out device
Material	Plastic, black
Mounting	■ Without ■ Panel mounting flange, plastic, black ¹⁾ ■ Mounting bracket, steel, zinc-plated ²⁾
Case filling	Glycerine ²⁾
Movement	Copper alloy

1) Only available for NS 63 [2 ½"]

2) For low scale ranges the case filling is a glycerine-water mixture
